

NetPD Records Management (RMS)

One of the most costly and time-consuming tasks for any Police department is record keeping. Creating timely, paper-based reports are a drain on manpower both in terms of effort and budget. Not any longer.

NetPD Records Management allows you to break through the Paper Barrier and not only create real-time records, but also store and retrieve them in a secure, timely manner all while maintaining data integrity.

FEATURES INCLUDE:

Crime Analysis/Incident Report

NetPD offers a wide-array of standard reports and data collection tools that greatly improve operational speed and efficiencies including the Crime Analysis/Incident Report. This reporting tool allows police departments the unparalleled ability to customize how they access, organize and analyze the data stored in the system.

Master Name Index

The cornerstone of electronic Records Management is the Master Name Index. NetPD gives officers instant access to this tool from a handy drop-down menu or a selection field. Known simply as the MNI, it's a virtual vault of essential police information. Officers routinely interrogate this utility first when inquiring about suspects and targets of investigations. A NetPD MNI inquiry on a name will return an address history, SSN/DOB, marital status, place of birth, day/evening/cell phone numbers, driver's license number, employer, physical features, mugshots, aliases, and known associates.

NetPD gives your officers the power of a robust MNI. Furthermore, we know the drill. Officers often deal with the same person more than once. Our NetPD MNI stores these names and profiles for use in every report as an
